Letter from the Secretary General

Distinguished participants and my future family members,

I, as the Presidents of Acibadem University Model United Nations Club and Acibadem University Model United Nations Conference 2020, would like to welcome you all to the very first session of ACUMUN which will be held on 17-20 January 2020. It is more than an honor for me to be able to lead such a precious and professional team under the umbrella of newly-established ACUMUNC as, with its unprecedented campus and well-qualified members, it will be one of the most important entities in MUN community.

In this conference, we prepared highly special committees with very specific procedures which are gathered from not only United Nations bodies but also other governmental bodies. Before stating several details upon our committees, I would like to proudly mention Midnight Crisis system which was simulated by me and my crisis team for the first time in Turkey and spread throughout other conferences. Since our first application of this unique procedure in HPALMUN, we have been supervising the ways to implement it in a better way and hopefully, you will have the chance to experience it. Starting from our committees, we have SOCHUM from our previous conference as being the most demanded committee within our application process. Our committees are all in Harvard Rules of Procedure so you can really experience a high-level academic quality even if it is commonly suggested to beginners and intermediate delegates. What is more, we have expert committee on child rights which is a common and remarkable subject lately, considering latest news upon numerous violations. Apart from them, we have security-based committees with cabinets, councils, secret FBI missions, futuristic councils and of course, world wars. Although it is really hard to define every single of them as having complicated Rules of Procedures, you should believe me on that it will not even resemble to any of your previous experiences. Operations will be more detailed, this simulation would not be separated from its real version, so please check the real functions of your committees before coming to our conference. One more difference from your other experiences, -if you have experienced my crisis committees before when I was an USG, you would definitely know this- you will be experiencing really intense crisis committee with significant number of updates and outcomes of your actions. You will be in need of tackling every single issue detailedly and also simultaneously with other issues. It might seem like it will be hard, yes but, you will be enjoying the themes very much that you would not like to leave this conference on 20th January.

Apart from the context of the committees, whole committees will be directed in accordance to Harvard Rules of Procedure which is more delegate-centered version that allows the members of the committees to firstly discuss the content of possible resolutions and than write it jointly. Other crisis committees would have several additional procedures that are specific to committee structure.

Summing up, we are preparing a conference with the best academic and organizational quality. We will have numerous surprises for you within the conference process.

Do not forget, we are Acıbadem, it is your place, it is where we unite the worlds.

I am really excited to see you all in the Conference.

Yours sincerely,
Korhan KARADENİZ
President of ACUMUNC and ACUMUN 20'

Letter from the Under Secretary General

Esteemed members of Futuristic UNSC, honorable guests and observers,

First of all, I would like to welcome you all to Acumun 2020. Over the years of studying in university, I've been a part of many mun conferences, made really close friends from muns and learned immensely from my experiences and it is safe to say that the most fun I started having was preparing my own committees and implementing my own ideas in those committees. I always wanted to prepare a futuristic committee because I love seeing participants react to unexpected situations and outcomes. In this year's Acumun conference I was given the chance to do so.

Our committee will take place in the year of 2051. A lot has happened between 2020 and 2051, our timeline will only cover the ones that are important for the committee, take notes members of the council. Nothing in the timeline is a simple news or a small update. I suggest you to read carefully, and if I were you more than once. Here is a small depiction of what 2051 World looks like. America is on the verge of being constitutionally divided, eco-terrorism still menace over the world. The new implementation on UNSC and the unrest that it causes in the committee for the P5 members. World's %70 of oil reserves becoming unusable and the sustain of production becoming one of the biggest problems of the era. The problems of the committee does not end with the ones mentioned above, you will have many challenges in these for days. Being creative and thinking outside the box is the most important trade a member will have for this committee. I hope everyone of you will be prepared for the chaos that will take the committee hostage.

Achieve Greatness in Chaos!

Bariş İzzet Sariahmet - Under Secretary General

The New United Nations Security Council

The United Nations Security Council is one of the six organs of the United Nations, charged with ensuring international peace and security, accepting new members to the United Nations and approving any changes to its charter. The Council is composed of 20 Members: Five permanent members: the People's Republic of China, Republic of Turkey, Russian Federation, the United Kingdom of Great Britain and Northern Ireland, and the United States of America, five semi permanent members elected for four-year terms and ten non-permanent members elected for two-year terms by the General Assembly. The Security Council has primary responsibility for the maintenance of international peace and security. It is for the Security Council to determine when and where a UN peace operation should be deployed. All members of the United Nations agree to accept and carry out the decisions of the Security Council. While other organs of the United Nations make recommendations to member states, only the Security Council has the power to make decisions that member states are then obligated to implement under the Charter.

The United Nations Security Council "power of veto" refers to the veto power by the five permanent members of the United Nations Security Council (the People's Republic of China, Republic of Turkey, Russian Federation, the United Kingdom of Great Britain and Northern Ireland, and the United States of America), enabling them to prevent the adoption of any "substantive" resolution.

After the events of 2030, United Nations Secretary General issued a statement in 2031 that the United Nations Security Council needs a reform due to being unable to work as it was meant to. France becoming a failed state, eco-terrorism happening around the globe and the seperation of USA, the council was not able to make quick decisions and the world was watching them. After the statement of the Secretary General council was pressured for a reform. In 2032, United Nations Security Council gathered in order to talk about the proposed reform.

Here is the most noticeable changes in the proposed reform;

- Due to France becoming a failed state, it is seen as the UN Secretary General that France should be replaced as a permanent member.
- Permanent Member States holds too much power and there has to be a balance made between the permanent members and non-permanent members, it was proposed that a middle ground "semi-permanent members" should be placed as mediators in the council.
- Semi-permanent members;
 - + There will be five seats for semi-permanent members, with the edition of the five semi-permanent members the total seats in the council reaches to twenty seats.
 - + When all 5 of the semi-permanent members votes in favor of the resolution, if a permanent member vetoes the resolution their veto will be overruled by the semi-

permanent members consensus vote on the resolution, this would be the case if two or more permanent members of the council vetoes the resolution it would still fail.

- + If all semi-permanent members votes against a resolution, it will be counted as a veto and the resolution will fail in any case. Including if all the permanent members votes in favor, it will still be a failed resolution.
- + Semi-permanent members will serve in the council for 6 years, these semi-permanent members are selected by the General Assembly with end of term year.
- + A semi-permanent member who served for a term can not be chosen for the next term. This means that a country can be chosen as a semi-permanent member every 12 years.

The proposal mentioned above has been discussed and rejected by the UNSC's permanent members for nine years. With the events of eco-terrorism and oil reservoirs being almost diminished, the eruption of Mount Etna, Russian Federation's economical crisis, United States being on the verge of a split and France becoming a failed state left an opening in the world power order. USA and Russian Federation finally agreed upon the terms of the proposed reform and accepted the Republic of Turkey to take a seat as a permanent member in France's position. France government was left without any option rather than accepting help from the Republic of Turkey and giving their seat in the UNSC.

- United Nations Security Council's 12.251th Meeting

On 17th of January 2051, the United Nations Security Council will have their 12.251 meeting in the United Nations Headquarters.

The main reason for the 12.251th meeting is about the latest updates that have been given on the timeline and the last terrorist attack by the group called One Earth.

One Earth

In year 2021, a group of environmentalist students who were studying environmental law in GeorgeTown University founded the organization called; One Earth. Their aim for this organization was to press on the issues of Global Warming, Greenhouse gases, Ozone Depletion and many other topics that is making our planet unsafe for humankind. In a short amount of time the non-governmental organization was becoming popular in North America. In the second quarter of 2021, founders of the organization had many TV appearances in well known shows by the Americans, such as “Good Morning America”, “Late Late Show with James Cordon”, “Jimmy Kimmel Live”. They were talking about how our planet is the only place habitable for us and even if humankind will find somewhere else to live, it will be too late for us to go there before this one becomes inhabitable and causes the population to fall under 5%. After their appearances in tv shows the organization was reached by many celebrities to donate money for their cause and promote their message actively and on social media. In 6 years One Earth reached over 300 million followers on Instagram, which was a first from an environmentalist organization. They were known worldwide by the second quarter of 2027. Past 6 years One Earth gained followers and supporters from almost every region on the planet. Some of their followers had extremist ideas on how to save humankind. On 11th of April 2025, Henry

Armstrong, one of the co-founders of One Earth has disappeared, his colleagues didn't worry in the beginning because this was a usual behaviour of Henry he would be gone for a couple days and be back. They started to get suspicious after a week of no show from him. After reaching out to the authorities, they were thinking that it was a kidnapping case for ransom. But there was never a phone call for a ransom. The news outlets covered the disappearance of Henry over a month, his colleagues put out awards for any information about his whereabouts and no one had any real information about him. After a year of searching, the police had to cancel their search due to budget cuts. His colleagues outsourced for an investigation and hired private investigators to find him, after 2 years of searching one of the detectives who was hired to gather information about where he is, picked up intel about what might have happened to him, he recovered his cell phone around Abner Cloud House in Potomac River, Washington D.C. from a homeless guys who claimed that Henry gave the phone to him and said to not delete anything and keep it close to you at all times, soon after his phone was discovered and his old messages were looked into. Detective Armstrong discovered couple of texts he got from strangers, threatening his life. Even though his body was never found due to the recent updates about his absence, District of Columbia Court issued a death certificate.

The tragic news of Henry Armstrong caused immense distress among his colleagues, thousands of people around the world show up for his funeral, showing their gratitude and giving condolences to friends and family. Soon after the funeral, Steven Gizeh was found dead in his apartment, one of the co-founders of One Earth. He left a note saying that he can't live on this cruel world that took Henry from him, exposing that they were secret lovers and the reason that they had to keep it a secret was the other co-founders who were against same sex relationships due to their religion and cultural beliefs. After the deaths of the co-founders of the organization, slight undetectable changes occurred in the organization that was picked up by their followers. In 2027 the organization reached its peak by becoming the sole global organization to gather 300 million followers on instagram and reaching every content with their message. During its peak year some extremist environmentalists popped up in the organization stating that they need to take serious action against people and organizations that are harming the world.

The organization kept being the most popular environmentalist organization between 2027 and 2039, governments started to invest and donate to the organization and their cause to save the earth.

In 2040, three locations around the globe was bombed, Jonesboro, Arkansas, Central Asia-center gas pipeline in Uzbekistan, and the oil rig located in the Kara Sea north of Siberia, as a protest would show the world that they need to change their ways. The attackers claimed that they were a part of One Earth. Co-founders of the organization, David Amari, Will Antoun and Michael Bukhari, held a press conference and stated that the organization had no part in those attacks and the attackers that claimed to be a part of the organization was unknown and unrelated to the organization. Soon after the press conference, co-founders of the organization had disappeared. Two weeks after their

disappearance, an IGTV video was released on the instagram account, on the video there were three men holding guns towards the heads of the founders and claiming that they are the attackers of the 28th of February attacks. They stated that they have emptied the accounts of the organization and will keep the founders as hostage. In their statement they kept repeating that humankind is killing the earth with their pollution and usage of oil in many industrialized companies, they announced to the world that this was only the beginning of their actions and if the world leaders won't change their ways, they won't stop.

After the video was released the world was in shock, the leaders of the free world stated that they won't bow down to a group of individuals. The following 10 years, the attackers continued their attacks under the name of One Earth, extremist idealists soon joined the organizations and One Earth became the biggest eco-terrorist in history.

Vladimir Putin's Death and the Aftermath

In the last quarter of 2025, President of Russian Federation Vladimir Vladimirovich Putin was visiting Uzbekistan President Shavkat Mirziyoyev. In his visit, the two presidents were talking about the future of Uzbekistan and how Russian Federation could be a part of this growth. The meeting was a success and both presidents left the meeting in a better mood. After the meeting Vladimir Putin was escorted to Tashkent International Airport to get on the presidential plane (Ilyushin Il-96-300PU), after the plane took off and reached altitude, the plane gave a warning signal that implicates something is wrong with the engines of the plane and there is a fuel leakage. The captain of Ilyushin [REDACTED] made an announcement to the cabin. His last words were; “Наши двигатели не работают, и с самолета также произошла утечка топлива, мы вынуждены разбиться о землю на предгорьях горы. Готовьтесь.” Which meant, Our engines are not working and there is also a fuel leak off the plane, we are forced to crash land on the skirts of the mountain ahead. Brace yourselves. Captain of Ilyushin had to crash land the plane in Kazakhstan close to a town called “Жанаорталык, Zhanaortalyk”. Due to the rough territory of the area using the landing gear of the plane was not an option. Crash report of the plane showed that the plane drifted about 50 meters on the ground and caught a spark due to the fuel leakage of the plane and started to burn. The autopsy report on President Putin shows that the impact of the plane landing was the cause of his death. Only survivors of the crash was Captain [REDACTED], and the second captain [REDACTED], according to the second captain because the first captain was never seen again, nor a body was found. The second captain was sent to prison for life due to him being the only suspect for the crash. The interrogation report indicates that he was questioned for the crash about a week and he never admit to any charges that he was being accused of nonetheless, Russian Federation found him guilty of Vladimir Putin's death and sentenced [REDACTED] for life in prison. After six months from the crash, an old CIA

agent [REDACTED], released confidential information about Vladimir Putin's death to the media outlets. The document being redacted only a handful of words were able to be understandable from the document. The document was saying that the death of President Putin wasn't an accident rather an assassination. Inside the documents, responsible party for the assassination was redacted and wasn't able to be retrievable. An investigation about the responsible party was started by the Russian government but it is unknown that if they ever found the responsible parties on the assassination of Vladimir Vladimirovich Putin.

With the death of Vladimir Vladimirovich Putin, while Chechnya's President was giving his condolences to Vladimir Vladimirovich Putin on his funeral, a chechen nationalist assassin Ramzan Kadyrov. Couple days later, Chechnya gives a statement that they will no longer be under the control of Russian Federation and announces their independence. Other Caucasus region nations supports Chechnya on becoming independent and in any case of an interference from Russian Federation they state that they would fight along side Chechnya. Russian Federation deploys their troops to Chechnya after two weeks of the funeral and while they are fighting on the border with a joint-army of Caucasus whom was able to hold Russian Federation's army at the borders for two weeks. In the meantime Chechnya and North Atlantic Treaty Organization, NATO, were trying to get Chechnya to become a NATO member, in a matter of a month after announcing their independence Chechnya became a NATO member and under the protection of Article 5.

With the recent events that has happened in Russian Federation, an economical crisis was inevitable. The death of Vladimir Vladimirovich Putin and Chechnya gaining its independence, joining NATO, shook Russian Federation's economy. The unemployment rate went up by 25% and GDP dropped by 30%. The new administration stated that they would do anything in their power to restore mother russia to its glorious state back again.

A Divided United States of America

After the election of 2020, Donald J. Trump being elected for his second term caused bigger incidents in Democratic party States. The biggest protests happened in Los Angeles-California, New York City-New York, Las Vegas-Nevada, Charlotte-North Carolina, Chicago-Illinois. One of the biggest rumors after the elections was that Governor of California, Gavin Newsom, was secretly talking about secession from the United States and becoming a Free State of California. The rumors were quickly denied by Governor Gavin Newsom and stated that the United States of America should stay together no matter what happens or who runs the country. In his speech he also mentioned that the Country doesn't consist of only the president and gave attention to the working political system of the United States and how it can work even with an unqualified president. After his speech the democratic party cities slowly stopped protests and the country seemed to gain stability for a while.

In 2020 elections Cory Booker was beaten by Donald J. Trump and he stated that he would be back for 2024 elections. In 2024 elections, Cory Booker has been elected POTUS by defeating his rivals with a big difference, by turning some of the republican states to vote for democratic party candidate, himself. After his inauguration, Mr. Booker announced his first 100 days and talked about his latest gun plan that goes after urban violence which was something he've been interested since 2020 elections. Cory Booker took wanted to the first steps for chances on the 2nd amendment with his urban gun violence solutions. But his bill never passed the congress and it caused more distress among pro-gun control states and its residents. Due to his lack of success in the office Cory Booker does not win a second term on 2028 elections.

In 2026 Dwayne Johnson runs for the governor's office of Florida and wins the elections. He is known to be an independent voter and he won the office by running independent. Later in 2028 he ran in the presidential elections as a Democrat party candidate and he was elected the new United States president. In his first 100 days plans statement, he included 2nd amendment changes/restrictions and talked about how there should be some restrictions to the gun laws in America. He gave examples from school shootings and how easy it is to obtain a firearm. He said, "You could buy an assault rifle in Walmart. Walmart! It is a place that kids goes with their parents. Everyday! If we don't change something in this country we will never grow and become a better nation. The gun violence needs to stop in America. Although, his speech moved most of the country some of the states were not happy about his plans for the second amendment and did not stay silent Governors of Texas, New Mexico and Arizona stated their concerns about the new bill and the changes on the 2nd amendment. After working on the bill for a year, on the last quarter of 2030 the bill passed by the vice president's tie-breaking vote. The bill passage upset a lot of people from the republican states and even uprisings happened in Texas, New Mexico and Arizona. The uprisings continued over three weeks before US Marshals had to get involved in order to stop the uprisings.

In 2031, the Make-a-Wish foundation reached Dwayne Johnson once again to make a dying kids dream come true. During his hospital visit Dwayne Johnson insisted to keep secret service at a distance to have a sincere moment with 11-year old Cindy, who had an unknown disease which was unable to be treated. He didn't even let secret service to check the hospital room for security measures saying, "I don't want a 11-year old being traumatized by the secret service. In the room, it was only him, and the parents of the child. While he was giving the child a hug on her deathbed, he was shot from a distance by a sniper. The shot was lethal and he died immediately. After the assassination of Dwayne Johnson, stock market values starts to drop rapidly and stock market was forced to shut down for a day. Even before the assassination of the president, the US economy was already suffering and the with the assassination of Dwayne Johnson it hit all time low since the 9/11 attacks in 2001. For the rest of the term his vice president Tom Hanks was the acting president until the 2032 elections.

After the elections of 2032 and Deval Patrick became the president of the United States. As a governor, he was focused on economic development and innovation, and made Massachusetts a hub for life science jobs. He took what he learned in Massachusetts and applied to the whole nation in order to stabilize the economy. He went on to serve for a second term after being elected again in the 2036 elections. In his eight years of service, Deval Patrick put America's economy in to a stabilized state.
